Project Treg — Bundle README & License

Merck / Pandion ($1.85bn) Integrated Acquisition Model — Premium Edition v1.0

What's in this bundle

File	Description
Merck_Pandion_Acquisition_Model.xlsx	17-tab integrated model: rNPV, sum-of-parts, comps, precedents, football field, S&U, ASC 805 PPA, accretion/dilution, pro forma, synergies, sensitivity, scenarios, error checks. 751 live formulas, zero errors.
Methodology_and_User_Guide.pdf	5-page practitioner guide: rNPV theory, PoS benchmarks, the acquirer-WACC bridge, ASC 805, schedule walkthrough, sourcing, how-to.
Deal_Book.pptx	6-slide editable IB-style deck: situation, football field, rNPV bridge, scenarios, methodology.
README_and_License.pdf	This file.

Quick start

1. Open the workbook. Go to the `Drivers` tab — your single control panel.
2. Set `C6` to **1** (Base), **2** (Upside) or **3** (Downside).
3. Change any blue/gold-shaded input. Black = formula, green = cross-sheet link (do not overwrite).
4. Read results on `Valuation_Summary`, `Football_Field`, `Scenario_Summary`.
5. Check the `Error_Checks` tab — the master flag must read **ALL OK**.
6. Excel recalculates automatically; press F9 (Win) or Cmd-= (Mac) to force a refresh.

Colour convention (banker standard)

Colour	Meaning
Blue text on gold fill	Hardcoded input — change these
Black text	Formula — do not overwrite
Green text	Link from another sheet — do not overwrite
Navy fill, white text	Headline output
